### GRINDERS/BUFFERS/SANDERS

#### BENCH GRINDERS

**POWERGRIND** bench grinders are built with high quality motors for heavy duty use requiring long service life. The precision ball bearings are engineered to reduce noise and vibration, while the cast iron base provides stability for long periods of heavy use. The heavy duty capacitor motors guarantee smooth running and reliable performance. These units are built for continuous and heavy stock removal to finishing applications. They are designed to handle all grinding, cleaning, deburring, chamfering, and sharpening jobs.

**INDUSTRIAL BENCH GRINDERS**

- UL listed
- Heavy duty capacitor motor
- Sealed bearings offer years of maintenance-free grinding
- Dust collection system, on select models
- CSA approved and OSHA compliant
- All grinders include 1-1/4" wheel dresser
- Industrial strength construction
- Meets OSHA guidelines and electrical requirements

2019-20 MASTER CATALOG
FINISHING MACHINES

2" x 42" BENCH BELT & DISC SANDER
• Deluxe miter gauge (turns and locks for common angles, 45° both left/right)
• Removable platen allows for sanding, grinding or finishing of outside, curves or odd shaped work
• Cast iron construction

20" DISC SANDER
• Direct drive motor
• Tilting table capability adds flexibility of 45° forward and 15° backward on positive lock rack and gear
• Table can be lowered below the disc to accommodate large work pieces
• Equipped with low voltage protection ON/OFF switch
• Foot brake for rapid braking

BET & DISC FINISHING MACHINE
For general purpose sanding and finishing on metal, wood, plastic and other materials. Typical operations include surfacing, finishing, sanding, polishing and deburring. Heavy duty construction for long life. Capacitor motors supply the extra current required during start-up and running under load. Belt housing that can be rotated from vertical to horizontal position for sanding long pieces. Tensioned belt mechanisms provide even sanding surface and easy belt changes.

INDUSTRIAL COMBINATION BELT & DISC FINISHING MACHINE
High-speed precision and amazing versatility. This rugged piece of equipment has a belt that operates at any angle, and conforms to curves, angles or circulate finishing and grinding operations. Machine that take great pride in their work prefer the JET Industrial Combination Belt & Disc Finishing Machine
